

IN THE UNITED STATES PATENT OFFICE

Application number: 10/528,208

Art unit: 1638

First named inventor: Carsten Meier

Title: Method of producing and screening antibodies produced in transgenic plants.

Filing Date: September 15, 2005

Examiner Name: Kathy Kingdon Worley

Attorney Docket Number: 604 42 PCT PA

Response to restriction requirement

The applicant hereby responds to the restriction requirement set forth in the Office Action mailed March 14, 2007: The applicant elects, without traverse, Group I, claims 1-9, drawn to nucleic acid construct comprising sequences encoding an immunoglobulin heavy chain and a light chain and a promoter, wherein the sequences of the heavy chain and light chain have been modified to alter the binding of a target antigen.

The undersigned attorney appears on behalf of the applicant pursuant to 37 CFR 1.34 only for purpose of this response to restriction requirement. No change of correspondence address is intended.

Respectfully for the applicants,

Robert Casad, Jr., Ph.D.
